

ENVIRONMENTAL MANAGEMENT POLICY

NCH Logistics Pty Ltd recognises its obligation to clients, employees and the general public in regard to minimising adverse environmental impacts resulting from its operations.

Our company is committed to continuously improving performance through an environmental management system based on a planning, performance monitoring and review process.

To achieve this we will:

- Identify the activities we undertake that have the potential to adversely impact the surrounding environment and through planning and operational control, eliminate or minimise the extent and severity of such impacts;
- As a minimum, comply with legal and other requirements;
- Reduce and where possible, eliminate waste and pollutants, from our office facilities and sites to where our machinery visits;
- Dispose of all waste in accordance with approved methods; and
- Promote employee awareness of environmental issues that will enable them to actively contribute in fulfilling our environmental objectives and obligations.

The policy was developed in consultation with employees, supervisors and managers and will be reviewed in February 2018.
